PROFESSIONAL SUMMARY

Software Developer with 1.5+ years of experience building and maintaining real-world business applications. A quick learner with strong problem-solving skills, capable of adapting to new technologies, frameworks, and development environments quickly. Comfortable taking ownership of new requirements, exploring modern technologies, and continuously improving technical skills to build efficient, reliable, and user-focused software solution

WORK EXPERIENCE

Ishravati Software Solutions 2026 - PRESENT

Projects

Premium Sarees & Lehenga - E-commerce Platform

- Developed a scalable e-commerce platform for sarees and lehengas using PHP CodeIgniter (MVC) and MySQL.
- Integrated Razorpay Online Payments and Cash on Delivery (COD) with order and payment status management.
- Built a dedicated role-based admin panel for managing products, categories, orders, customers, and administrative users.
- Implemented secure authentication features, including admin creation, role-based access, forgot password, and email-based password recovery.
- Integrated email notifications and dynamic action messages for order updates, authentication events, and other administrative operations.

NewsWave India- CMS News Portal

- Developed a CMS-based news portal using PHP CodeIgniter (MVC) and MySQL for structured news and category management.
- Integrated Summernote Editor for creating and managing rich-text news content.
- Implemented Role-Based Access Control (RBAC) for Admin, Editor, Reporter, and Comment Manager roles.
- Optimized news and comment management with server-side pagination and efficient data loading to reduce server load and improve performance.
- Developed an admin dashboard for content publishing, comment moderation, user management, and category-wise news management.

Business Management & Inventory System

- Developed a business management system for customer billing, order management, inventory tracking, and payment management.
- Implemented customer billing and payment tracking, including paid, due, payment dates, transaction history, and printable invoices.
- Added customer search by mobile number to instantly retrieve existing customer details, orders, bills, and payment history.
- Developed dynamic inventory and category management for Tiles, Marble, Granite, Accessories, Machinery, and other business products with quantity and selling price tracking.
- Built a centralized management system for customer records, sales, stock levels, billing, and payment history with efficient day-to-day business operations.

INTERNSHIP

April 2025 - Oct 2025

Ishravati Software Solutions

- Built responsive UI using HTML, CSS, Bootstrap
- Worked with PHP for dynamic content
- Learned CodeIgniter structure and basics
